Transition from school to university is one of the most challenging events in a students' life. There is a lot that a new starter needs to know, which can be quite overwhelming. By creating a tailored induction program for new students, they may feel more comfortable in their new surroundings and have a better understanding and the expectations of their role going forward. Therefore, this organised induction programme have outlined the area, specialisations of Heads of different Departments of SIT, roles of various faculties, working criteria's of various clubs and essence of Symbiosis culture ; "Vasudhaiva kutumbakam". The main objective of this induction programme is to assist new students from diverse backgrounds to quickly settle down and be part of the productive teams.

Introduction to Civil Engineering Department

	Date	Day	Time	Event Name	Venue
DAY 02	19.08.2022	Friday	11:45AM-12:45 PM	Introduction to Department	[Civil F10 (A 103)]
			2:00 PM-3:00 PM	Departmental Activity	[Prof. Vaishnavi Dabir] [Civil F10 (A 103)]

On a very warm morning of 19th August we welcomed 1st year students of civil Department with the assistance and guidance of our very kind faculty Prof. Amar Jain. Thereafter, formal introduction of different faculties was delivered by Prof. Amar Jain. Later, they were briefed about first year subjects, teaching learning process and infrastructure of the college. Moments later, we had an informal interaction regarding difficulties faced by the students, clarified their queries regarding ragging in the campus, acknowledged them about the anti-ragging cell.

Shortly after, a brief idea about college life, hostel life, different sports activities i.e. Prota (Annual official sports event), annual cultural events i.e. reverb, Aarambh, transcend etc. being organized on campus. Then an entertaining activity was conducted in which a sentence was passed to one another and they improvised and continued the story, it was very amusing and with this we ended our very first departmental induction session.

Time- 2:00p.m. - 3:00p.m.
Venue- A103

Unfortunately, due to less presence of students it was decided to conduct Debate instead of Extempore competition. Students were divided into 2 groups of 3 students each. The given topic was Impact of engineering on the environment- for and against the motion. Opening statement was given by Rohan and then the other started team cross questioning him, it was an enthusiastic exchange of thoughts between both the teams where Yash slipped with some of his facts, and then his teammate, Sangay C was able to cover it up with her strong ending statement. After ending statements from both teams our under experienced Students Riya V. and Pranav J. corrected their facts and mistakes. In the presence of faculty Prof. Vaishnavi Dabir and Prof. Amar Jain winners were announced i.e. Team that was against the motion; Yash, Haris, Sangay C.

Day- 4 (22th August 2022, Monday)

Time –2:00p.m – 3:30p.m

Venue- A103

Mentor Mentee with Students

Mentor mentee is a designated safe space and time for the students to address their grievances to the management via their mentors. This day was special for the students and the management as a new mentor mentee relation formally began for the 2022-2026 batch. Designated mentors Prof. Vinay kumar Jatti and Prof. Amar Jain introduced the students to the system.

Introduction to Departmental Clubs Civil Engineering Society of Symbiosis [CESS]

	Date	Day	Time	Event Name	Venue
DAY 05	23.8.2022	Tuesday	2:00 PM-4:00 PM	Introduction to Departmental Clubs Civil Engineering Society of Symbiosis [CESS]	Civil F-10 [A103] classroom & Concrete Technonology Dr. Sayali Sandbhor

Students were introduced to CESS i.e. Civil Engineering Society of Symbiosis, ASCE and TTC. After being introduced to CESS, students learned about its purpose and function. The entire civil engineering department attended this session, including the faculty and the students. A new head of the civil department was appointed, as our former head Dr. Kanchan Khare was promoted to a higher post. Newly appointed HOD, Dr.Sayali Sandbhor interacted with everyone and praised the former president, vice president, secretary and the other heads of CESS.As all the former post holders received their participation certificate, new student officers were introduced who were earlier elected.

Day-6 (24th August 2022, Wednesday)

Time –9:15A.M.– 10:20A.M

Departmental Activity: Extempore competition

	Date	Day	Time	Event Name	Faculty Name
Day-6	24.8.2022	Wednesday	9:15AM - 10:20AM	Extempore competition	Prof. Amar Jain

This day tested the student's communication, and spontaneous thinking skills. The students were given specific topics related to civil engineering and the environment with a minimal time of 5 minutes to ponder upon their speech. Some of the students stunned the audience with their exceptional skills others although were new to this, tried their best. The winners announced were as follows –

- (1) Rohan Agrawal*
- (2) Sangay Choden*
- (3) Haris S.T.*

UHV was compiled with SDGs for dissemination during the first year induction programme. The sessions were spread across 10 contact hours. The pedagogy was a blend of classroom interaction, group discussion, hands-on activities and experiential learning. 560 students were divided in 9 venues. Five elements of earth namely earth, fire, wind and water along with space which binds them were selected as a theme. Earth, Fire and Wind was conducted at two venues each and water was conducted at 3 venues. A venue lead faculty of civil department was assigned with three faculty mentor from other departments. As students are aware about the five elements since childhood, the first session was designed such that the advancement in the particular element was discussed using case studies. The faculty showcased definitions and advanced technology to handle the imbalance in space for the particular element (Earth, Fire, Wind, Water respectively at their venues). As students were enlightened about the technology to handle the issues with the participants element, the next session was dedicated for a unique activity. The next session then showcased that despite of the available technology, there is yet an imbalance in the element and showcased prominent disasters caused due to human conduct. The placement of the activity in such way resulted into truly enlightened students who were motivated student for taking an action. Therefore a task of designing a hand-made poster was given to them. The students had to include a case history of disaster observed in the element due to human conduct and propose a hypothetical solution for the same. The activity gave students freedom of expression and displaying creativity. Three hours (1 on each day) was given to them to brainstorm with peers as well as student mentors and faculty mentors. Students then submitted an abstract of their idea. actual poster making was allowed for next 3 contact hours. on the 10th day, a poster exhibition was organised for them. here students as well as faculty visited and interacted with the teams to listen to their ideas. To further aid the spread of message using a creative expression, students of common elements were clubbed together and categorised according to their interest areas like singing, dancing, script writing, and direction. Students then were given 8 days to prepare a 10 minute act using the creative expression form to showcase the problem and solution to handle the element. overall the event was planned and executed perfectly by students and led into students sensitised for sustainability and balance/imbalance in the element. The aim of sensitising and charging the students towards working for climate blending with SDGs was achieved with this extensive and systematically planned program.

DAY 08	26.8.2022	Friday	2:00 PM-3:45PM	Tinkering Activity Session	Prof. Rushikesh Kulkarni, Prof Humera K., Prof. Amar Jain

Tinkering lab refers to a space where youngsters can experiment with, learn, develop and conceptualize different scientific ideas. It is a lot similar to the DIY method where the students are encouraged to apply the knowledge that they have gained in the classroom.

This session was conducted by Mr. Hrishikesh Kulkarni and Mrs. Humera students got to learn about what tinkering is and its importance. Mr. Hrishikesh made it very clear that, with the theoretical knowledge one should also have hands on experience.

To give them a basic knowledge of a civil student, they were taught to make concrete pot. As part of their lesson, both the faculties explained how to make concrete pots, introduced them to all the tools and materials, and outlined the procedures and precautions that have to be taken. Students were then divided into three groups of their choice and it was then, that they began making concrete pots under the guidance of student volunteers, Tirth and Ratna. The session got over with three beautifully made concrete pots.
