About:

The Robotics Process Automation (RPA) Club at Symbiosis Institute of Technology was inaugurated on 4th August 2022. It is a dynamic student organization dedicated to exploring the cutting-edge field of Robotics Process Automation. With a mission to foster innovation, collaboration, and skill development, the club provides a platform for students interested in automation technologies to connect, learn, and engage in hands-on projects.

Highlights:

- Learn from experts: Our club hosts workshops and seminars with leading experts in the field of RPA. This is a great opportunity to learn about the latest trends in RPA and get your questions answered by people who are at the forefront of the field.
- Gain hands-on experience: We offer hands-on workshops where you can learn how to use RPA tools and technologies. This is a great way to develop your skills and build your portfolio.
- Network with fellow students: Our club brings together students from all disciplines who are interested in automation. This is a great opportunity to meet new people, collaborate on projects, and make lifelong connections.
- Compete in competitions: We participate in RPA competitions that challenge students to use their skills to solve real-world problems. This is a great way to showcase your talents and win prizes.

- Get ahead in your career: Our club provides access to internship opportunities, job placement assistance, and industry networking events. This will give you a head start on your career in automation.

Annual Report 2022-2023

- **Inauguration (4th August 2022)**
- **Core Committee Interviews (29th August)**
- **Monthly Automation Challenge (29th October 2022)**
- **Weekly Meets every Wednesday (11th January onwards)**
- **‘Learn , Automate and Digitalize’ Event (25th & 26th Feb)**

- **Student enrollment forms(11th August 2023)**
- **Automation Bootcamp, SymbiTech Event - Guest Speaker (21st September 2023)**

The Robotics Process Automation (RPA) Club at XYZ College organized the "Automation Bootcamp" event during the annual technical festival. The event aimed to educate students about process automation, web automation, and data extraction.
Mr. Gajanan Patil, Automation Lead at Acceleriate Inc., served as the guest speaker. He delivered an engaging keynote address, sharing insights into the importance and applications of process automation.
The event included interactive workshop sessions where students learned about automation tools such as UiPath, Automation Anywhere, and Selenium.
A web scraping competition challenged participants to apply their skills in web automation and data extraction to solve a practical problem.
Overall, the Automation Bootcamp event provided students with valuable knowledge and hands-on experience in automation technologies, fostering innovation and skill development among attendees.

- **Automation Literacy - Workato Tool Workshop (13th October 2023)**

The workshop was led by Niyaz Ahmed and Abhishek Dixit, experienced industry experts in robotic process automation (RPA). The students learned about the different types of RPA tools, the benefits of using RPA, and how to implement RPA in their workplaces. They also had the opportunity to participate in hands-on exercises and to ask questions from the experts.
