Club

Name of the Club: V@rSITy-care

About the Club: V@rSITy-care, the social awareness club at SIT, aims to bring about a change in society by inculcating empathy, compassion, and a sense of social responsibility in young engineers. We believe in the importance of creating a socially conscious environment and empowering youth to work towards India's challenges. With this belief, V@rSITy-care intends to develop a culture of participation in social development-oriented activities and take up initiative among students by providing them a platform to learn, interact, and act. This community service club was started in 2014 and has been volunteering actively since then to spread happiness and bring a change both on and off campus.
